RE: City of Mobile Bid #5357 for Traffic Poles

Please consider the following to be Addendum to City of Mobile Bid #5357 for Traffic Poles.

PAGE 2 OF 6, PARAGRAPH C:

Pedestrian pedestal shafts shall be 8 foot 16-point sharpened fluted shafts. School flasher pedestal shafts shall be 14 foot 16-point sharpened fluted shafts. The top shall be designed to fit a standard 4 inch slip-fitter attachment. A hand hole with cover, approximately 4 inches by 6 inches dimension, shall be provided in the base of the pedestal shaft. A cap for any exposed open end of a pedestal shaft shall be provided. The cap shall be cast aluminum and of the nipple or tenon mounting type.

REPLACE WITH:

Pedestrian pedestal shafts shall be 8 foot 16-point sharpened fluted shafts. School flasher pedestal shafts shall be 14 foot 16-point sharpened fluted shafts. The top of the pedestal poles shall be designed to taper such that a standard 4 inch slip-fitter can be affixed to the top. The pole should include the cast aluminum 4 inch cap of the nipple or tenon mounting type. A hand hole with cover, approximately 4 inches by 6 inches dimension, shall be provided in the base of the pedestal shaft.

PAGE 3 OF 6, PARAGRAPH H:

Additional Features.

All hardware shall be stainless steel or anodized aluminum.

Each traffic signal pole shall be provided with an ornamental pole top. The multi-casting stacked pole top shall be mechanically attached to the top of the shaft to provide access to siring signals secured by a j-hook wire support. The design of the finial included in the bid shall be submitted with the bid, in addition to any alternative design that can be substituted at no additional cost.

The traffic signal poles shall include a GFCI receptacle with in-use weather-proof cover 10 feet above finish grade on the side opposite the mast arm. Cover shall be aluminum, lockable and finished black to match the pole.

The traffic signal poles shall provide banner arms, top and bottom. A welded coupling shall be included directly under the mast arm (approximately 16 feet above grade) and the lower coupling placed as to accept a 6 foot x 2 foot banner (approximately 10 feet above grade). All couplings to be plugged on deliver and banner arms shipped detached from pole.

All couplings to be plugged on deliver and banner arms shipped detached from pole. The banner arms shall be designed to breakaway at a wind speed lower than that of the design wind of the pole.

PAGE 5 OF 6, CLARIFICATION:

The decorative bases illustrated are for reference only and are intended to provide the general style that the city is seeking for this project. Bidder should submit a decorative base option that is similar in nature to the samples provided. Also include any additional base options that the City could select in kind that would not alter the bid price submitted for the poles.

SHEET NUMBER 81 AND 83:

THE CITY OF MOBILE WILL PROVIDE THE PEDESTAL POLE ONLY

REPLACE WITH:

THE CITY OF MOBILE WILL NOT PROVIDE THE PEDESTAL POLE ONLY
